These certifications are essential to verify compliance with potable water standards and must be readily available during the post-qualification evaluation of prospective bidders.</u>	

4. Quantity Requirements

- The supplier shall deliver a specified quantity of water, to be determined based on the needs of each shelter.
- The quantity will be communicated in advance and may vary depending on the season, population, and other factors.

5. Delivery Schedule

- Water deliveries shall be scheduled regularly and in accordance with the needs of the shelters.
- The supplier must adhere to a predefined delivery schedule, ensuring timely and consistent supply.
- In cases of emergencies or unexpected demand, the supplier should have the capacity to deliver additional quantities promptly.

6. Packaging and Storage

- Water must be delivered in clean, sealed, and food-grade containers, tanks, or bladders.
- Containers must be clearly labeled with the supplier's information and the date of filling.
- The supplier is responsible for ensuring that the containers are free from contaminants and suitable for potable water storage.

7. Delivery and Transportation

- **The supplier must maintain a fully equipped fleet of water trucks to ensure consistent and reliable transportation services within the designated area.**
- The supplier must use clean and appropriately equipped vehicles for the transportation of potable water.
- Drivers and handlers must be trained in proper hygiene practices and the safe handling of potable water.

8. Emergency Provisions

- **The supplier must have a contingency plan in place for providing water during emergencies, such as natural disasters or equipment failures.**

9. Payment Terms

- **Payment terms will be in monthly basis or as agreed upon in the contract, with consideration for the volume of water supplied and the frequency of deliveries.**

10. Duration

- **Fully delivered of 10,000 cubic meters of potable water within a period of 10 months, or whichever comes first.**

11. Acceptance and Monitoring

- **The MRP-PMO will conduct regular monitoring and documentation of supplier deliveries through the Inspection and Acceptance Report (IAR). This report will serve as the official reference along with the Delivery Receipt for tracking the total quantity of potable water delivered and accepted, ensuring alignment with the agreed specifications and delivery schedule. Any discrepancies between ordered and delivered quantities will be documented, and corrective actions will be initiated as needed to maintain compliance and service quality.**

	<p><u>12. Contact and Communication</u></p> <ul style="list-style-type: none"> • <u>The supplier must provide contact details for customer service and emergency support.</u> • <u>Any changes in delivery schedules, quantity requirements, or quality issues must be communicated promptly to the relevant authorities.</u>
